

## Viewers want to know- *does the Thundershirt really work?*

Thundershirt has helped hundreds of thousands of dogs and cats across the nation suffering from anxiety and stress, most often caused by storms. But the concept is so simple it may have you asking yourself- *does it really work?*

Using a gentle, constant pressure to calm your dog or cat, similar to the way parents swaddle their infants, Thundershirt effectively relieves any anxiety, fearfulness, stress, barking and more.

But, don't just take our word for it- put it to the test yourself with our new *Scaredy Pet Challenge!*

We will provide you with three Thundershirts to test on local dogs and/or cats in your area. All we'll need are your shirts' size requests, shipping instructions and deadline. You can visit [www.Thundershirt.com/Media](http://www.Thundershirt.com/Media) for a direct link to the *Scaredy Pet Challenge*, to view all of our product press releases, watch testimonial videos and more.

You'll have fun with this story, and we'll be happy to assist you along the way!

Looking forward to hearing from you!
